MEMORANDUM FOR DEPUTY DIRECTOR, MOL PROGRAM

**SUBJECT: Application of 375-Series Management Procedures
to MOL**

The unique management structure and environment within which the MOL System will evolve will continue to make necessary a number of deviations from standard system acquisition policies and procedures. The necessity for such deviations was recognized in MOL Program Directive 65-1, Management of the MOL Program, which provides for system management within the intent of the 375-series of regulations and manuals, but permits selective application of individual provisions of these directives whenever full implementation is prejudicial or inappropriate to the MOL effort.

The application of the 375-series directives and manuals to the MOL management system as proposed by the Deputy Director, MOL is approved. He is authorized to waive additional provisions of these regulations and directives as he deems appropriate. Staff support from Air Force Systems Command or other agencies normally involved in the implementation of the 375-series directives and manuals will be made available as necessary at the request of the Deputy Director, MOL.

SIGNED

B. A. SCHRIEVER
General, USAF
Director, MOL Program
