WORKING COPY

BYE-5398-69

Copy 2 of

3 SEP 1969

MEMORANDUM FOR: Security Advisor, NRO Staff

SUBJECT : BYEMAN Security Policy Guidance
Close Out of Project DORIAN

REFERENCE : WHIG 9285, 28 August 1969

1. The Special Security Center has reviewed the BYEMAN security policy proposed in referenced cable and offers certain changes and additions for your consideration.

2. With relation to the fact that there is no provisions in the BYEMAN Control System for a sanitization procedure, changes are suggested to use the term "delete" rather than "sanitize". In stipulating that access to DORIAN historical documents requires a GAMBIT access approval it was felt advisable to include caution on GAMBIT briefings if this approval was being granted solely for purposes of access to historical DORIAN materials. Guidance has been added to cover the possibility that the DORIAN historical document might be controlled in the TALENT and/or COMINT in addition to the BYEMAN Control System. Further, a section has been added to consolidate guidance in the debriefing of DORIAN personnel.

3. The inclusion of these changes and additions result in the following version of the proposed guidance.

"The following procedures will be used regarding the dissemination and control of documents and materials currently controlled under Project DORIAN.

"Those documents uniquely DORIAN will be retired or destroyed as appropriate.

"Documents that are controlled under one or more BYEMAN compartments in addition to DORIAN will have DORIAN information deleted and DORIAN controls removed.

"Documents of historical value, where deletion of all DORIAN information is not desirable or feasible, and the documents are controlled under one or more BYEMAN compartments or under BYEMAN and other Compartmented Control Systems, will be made available only to individuals who have (1) a must know requirement as determined by the responsible SIO; (2) a GAMBIT access approval; (3) appropriate access approvals for materials protected by other Compartmented Control Systems if the DORIAN document reflects such control systems.

"The following procedures will be used regarding the debriefing of individuals approved for DORIAN materials in closing out Project DORIAN:

(a) BCO's and/or BSO's will review their registers of DORIAN cleared individuals and determine what individuals will require continuing access to historical DORIAN material. These individuals will be granted approvals for access to GAMBIT materials but will not be briefed in depth on project GAMBIT if

the only reason for selection is access to historical DORIAN materials. All other individuals are to be debriefed.

(b) BSO's, BCO's are authorized to "administratively debrief" DORIAN approved individuals. "Administrative debriefing" for DORIAN approved individuals requires: (1) A determination by the BCO, BSO that no security advantage would be gained by the debriefing or that the individual is not reasonably available in terms of distance, dollars or man hours required to reach him. (2) A written notification to the Chief, [REDACTED]

[REDACTED] CIA, [REDACTED] Langley, Virginia, stipulating that the individual is to be removed from the register of DORIAN approved personnel, and that his DORIAN access approval is no longer to be certified to requestors.

4. The Special Security Center concurs in the use of the above form of BYEMAN security policy in closing out Project DORIAN.
