of the subject at this time. Should
SP approve the request we will
investigate fully prior to any
adjudication.

I will keep close touch with
Ray and inform you of any
changes in the status of the request
by AFSPF.

File RAR A-4

Ray informs me that the
AFSPPT has been assigned its
own Civil (read maintenance) Engineering
force from WAFB resources. He does
not know whether or not they are
full time employees of the AFSPPT.
Taylor is of course going to SP
with the request and should it
approve Ray expects to be
provided the answers to several
Key questions on:

Positions, Functions, Duties,
Reason for access, full or part-time, etc.
That is the extent of our knowledge

Captain Meeda
Captain Rose

I indeed do want
to know about Part I.

Please advise.

MEMORANDUM

September 17, 1969

4c gpt -

I don't believe you want to know about Part I of the message so I will address only part II.

On Sept 9 [redacted] was in Capt Loeis' office. [redacted] said hello and [redacted] began laying out the lab problem. He stated that TK individuals in the lab are handling engineering photography marked CORONA and GAMBIT. He felt that they

Should be briefed by COM ---
The lab people don't need
detailed characteristics but need
only to recognize the significance
of CORONA and CAMBIT. The
function they perform is
administrative in nature with
regard to PERSUM material. I
asked how much photography
was processed. He stated that
although it was a limited amount,
it was processed in the same
manner as all the TK photography.

Capt Low and I discussed
and of course made no
commitment since SAFSP
must recommend on the
 requisite billet actions. I
believe [] understands
the flow and has reflected
his understanding by sending
us an info copy only.

Such was the "writing"
referred to in the message.

I shall inform you of any

Whether Maj. Lisciolle referred
or not is as always totally
irrelevant to any of my

Captain Meleda
Captain Rose

Will one of you two
please explain to me
what is going on
at SPPF. I saw

[redacted] roaming about
the Pentagon and 40000
about a week ago. Sure
haven't heard a thing
from either of you!!!
Anything that [redacted] is
Liscioth and [redacted] is
questionable at best.

I see is
commencing the "lay
it all on the dead
man" approach.
